Work History

Flutter & Full-Stack Developer

Remote / Local & International Clients
2025 - Present

- Developed mobile apps using Flutter integrated with TMDB API
- Built customer form applications with dynamic fields and document upload
- Implemented full-screen map, OCR, and face comparison features
- Managed backend API integration and state management using Cubit/BLoC

Full-Stack Developer

Freelance / Personal Projects
2024 - 2025

- Maintained web apps and mobile apps using Laravel, CodeIgniter
- Created backend features, REST APIs, and database integration
- Assisted in AI-powered personalized content and learning module development

Other Projects / Contributions

- Built multiple portfolio and client apps using Flutter & React Native
- Implemented AI-assisted workflows with OpenAI APIs

Career Objective

Innovative and versatile Full-Stack and Mobile Developer with hands-on experience in Flutter, Laravel, and modern web technologies, seeking opportunities to build scalable, real-world applications and contribute to impactful projects. Passionate about leveraging state management, API integration, and UI/UX design to create seamless digital experiences. Eager to collaborate with global teams, solve complex technical challenges, and help businesses grow through technology-driven solutions while continuously enhancing my development expertise.
